

**City of Lyons REQUEST FOR PROPOSAL (RFP)
Lead and Copper Rule Revisions**

Per Section 3.3 all submitted questions regarding the above-posted RFP are answered below.

Could the City clarify the role of the consultant concerning the assistance of the development of the inventory? For example, is the expectation that the consultant carry out all aspects of the development under the supervision of the City or instead provide technical assistance where needed?

A-Technical Assistance only would not be sufficient to fulfill the needs of the City.

What relevant records are available to review? In what state are these records e.g., digitized, linked in GIS, paper engineering drawings, etc.?

A-As stated in the RFP the City has GIS Records showing the location of all meters in the City.

What is known (diameter, material, etc.) about the existing lines, private and public, in the system? Does the system expect lead service lines (either private or public) to exist?

A Very Little

If there isn't firm knowledge about existing service lines, are there estimates about material type for the private and public portions of the service line?

A-No

Has the system previously found lead service lines? If so, on which portion of the line? Were they replaced?

A-This is also unknown.

Has the system previously found galvanized lines? If so, on which portion of the line?

A-Unknown

What, if anything, is known about the presence of lead pigtails, connectors, and goosenecks within the system?

A-unknown

How much of the City's infrastructure pre-dates Georgia's lead ban of 1985?

A-Unknown

What is the ownership structure of the service line e.g. where does the private portion of the service line typically begin?

A-The City owns to the meter. Private ownership begins after the meter.

The meter shape files provided indicate 2101 connections: where are the meters generally located relative to the property? Can the public and private side of the service line be seen when the meter box is opened?

A-in the right of way. Yes

What staffing, resources, and equipment are available to address the lead service line inventory? Does the City have a hydrovac?

A-None / No

What is the proposed budget for this project?

A-Unknown
